-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4, 5, 8, 9, 12 are rejected under 35 U.S.C. 112, paragraphs 1 and 2, as the claimed invention is not described, or is not described in such full, clear, and exact terms as to enable any person skilled in the art to make and use the same, and/or failing to particularly point out and distinctly claim the subject matter which applicant regards as his invention. Specifically:

There is confusion about the nature of compound I-1. It is thus either not enabled (paragraph 1) or not depicted correctly (paragraph 2).

The material is identified on page 2, line 4, as having 3 water and one ethanol; this appears again as the next to last formula on the page. Page 5, lines 5-9 of the specification gives the spacings data for this, which data appears in claim 4 with the same numbers. Claim 1 and claim 4 are thus the exact same material; the claims are objected to as duplicates. Likewise for claims 5, 8, 9, and 12.

In the parent 10407546, the same data appears for I-1 on page 5, lines 5-9. The material is identified on page 2, line 4, as having ½ carbonic acid and ½ ethanol; this appears again as the next to last formula on the page. The exact same material is presented in both applications with a completely different identification. This is not a trivial difference; one says that that the material has water and the other says it has carbonic acid (half-carbonate), and the amount of ethanol is doubled.

Art Unit: 1624

The is no Obviousness-type Double Patenting rejection needed over 10351944 as that case does not have these solvates.

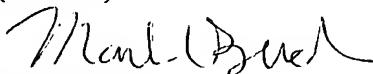

Specification

The abstract is objected to as not reflecting the claimed invention. The claims are drawn to solvates, but the abstract makes no mention thereof.
